

LORICA

Short-Term Bond

June 2021

Firm Overview

Lorica is an investment counsellor, committed to providing an entire investment service including management, administration, communication and compliance. Lorica's investment team and process is characterised by stability, security and consistency and an ongoing commitment to delivering superior results.

Philosophy

Underpinning Lorica's investment philosophy is a belief that value can be added through active management in all market environments. We believe a comprehensive range of core bond market competencies can be used effectively to manage within a central risk management paradigm. Economies and markets are dynamic, and we have learned they call for an adaptive, subjective approach to forecasting. However, construction of diversified, yet targeted portfolios is ideally suited to our proprietary computer-based models and algorithms.

Investment Strategy

An actively managed short-term fixed income strategy investing in government and investment grade corporate bonds. The investment strategy includes duration and yield curve management; and sector, industry, issuer and individual security selection; with an emphasis on duration and credit risk management.
